

The real impact of the campaign is, of course, the opportunities and help given through our grants to those experiencing homelessness.

Our volunteer Grants Committee members, who work in the homeless and NFP sector, have made your donations stretch a long way. Communities that have raised money have seen their efforts rewarded with grants to their local communities and beyond. The smaller organisations we support through this process rarely receive extra funding and the mix of projects is varied and innovative. What they can do with so little funding is staggering. Your dollars get a very good workout!
